FID (OID)

Internal feature number.

CDSCode (String)

This 14-digit code is the official, unique identification of a school within California. The first two digits identify the county, the next five digits identify the school district, and the last seven digits identify the school.

District (String)

School district name.

School (String)

CDE Full school name.

Street (String)

The unabbreviated street (physical) address of this school.

City (String)

The city where the school is physically located.

ZIP (Double)

5-digit ZIP Code derived from CDE Zip field.

OpenDate (Date)

The date the school opened. An empty cell indicates that the start date precedes July 1, 1980, the date the California Department of Education began to maintain this information. Most private schools do not have an open date.

Charter (String)

This field identifies charter schools.

DOCType (String)

The District Ownership Code Type is the text description used to identity the Administrative Authority.

SOCType (String)

The School Ownership Code Type is the text description of the type of school.

GSoffered (String)

The grade span offered is the lowest grade and the highest grade offered or supported by the school.

ShortName (String)

Short 20-character or less school name. Derived from CDE school name.

ID (Double)

SANDAG in-house ID (codes 9xxx - 10xxx).

Priv (String)

Private school indicator (Y or N).

Shape (Geometry)

Feature geometry.

Shape_Area (Double)

Area of feature in internal units squared.
